PROFESSIONAL SUMMARY

Computer Science graduate with hands-on cybersecurity and enterprise IT support experience in public-sector environments. Experienced in security event monitoring, endpoint security, system patching, Active Directory, and technical support, with practical exposure to SIEM-based monitoring using NetWitness, endpoint security using Bitdefender GravityZone, and patch management using ManageEngine. Certified in Google Cybersecurity and Cisco CCST Security, with additional practical training through TryHackMe and Hack-The Box Academy

SKILLS & COMPETENCIES

- **Security Operations & Monitoring:** NetWitness SIEM, Event Analysis Incident Triage & Escalation, Vulnerability Assessment, Phishing Awareness & Training.
- **Threat Intelligence & Frameworks:** MITRE ATT&CK Framework, CVSS Scoring, Indicators of Compromise (IoC) Analysis, CVE Research.
- **Endpoint & Systems Management:** Bitdefender GravityZone, ManageEngine Patch Management, Active Directory (User Provisioning & Access Control), Windows & Linux Administration, Command-Line Operations.
- **Networking & Tools:** Nmap, Wireshark, TCP/IP, DNS, DHCP, LAN/WAN/VPN, Microsoft 365, SharePoint Administration.
- **End-User Support:** Windows OS, Microsoft 365, Active Directory User Management, Hardware & Software Troubleshooting.
- **Professional Competencies:** Analytical problem-solving, cross-functional teamwork, executive-level technical support, incident root-cause analysis, premium customer service.

PROFESSIONAL EXPERIENCE

Cybersecurity Intern | Energy and Petroleum Regulatory Authority (EPRA) — Nairobi, Kenya

May 2026 – Present

- Monitor security events using NetWitness SIEM and review alerts to support incident identification, triage, and escalation.
- Manage endpoint security activities using Bitdefender GravityZone, reviewing endpoint status and security alerts and supporting antivirus agent deployment under supervision.

- Execute system updates and software patch deployments using ManageEngine Patch Manager to support vulnerability remediation and system security.
- Administer Active Directory and Microsoft 365 environments, supporting user provisioning, access management, and technical escalations.
- Configure and deploy workplace IT equipment, including IP phones and workstations, while providing Tier 1/Tier 2 technical support.

ICT Support Intern | Nairobi Centre for International Arbitration (NCIA) — Nairobi, Kenya
May 2025 – May 2026

- Led a group of interns and ICT attachés in delivering cybersecurity awareness training on phishing and social engineering to staff.
- Supported end-user IT operations, resolving Windows OS, application, printer, and domain connectivity issues for internal staff.
- Conducted basic network diagnostics involving TCP/IP, DNS, and DHCP to troubleshoot local connectivity issues.
- Managed Active Directory user access and maintained hardware and software inventory records.

SECURITY PROJECTS & LAB PRACTICALS

SOC Level 1- TryHackMe

- Completed Practical labs covering SIEM investigation, network traffic analysis, Wireshark, alert triage, and security operations.

Vulnerability Assessment & Threat Intelligence Report- Independent Project

- Conducted network reconnaissance using Nmap to identify open ports, running services, and service versions.
- Analysed identified services and researched relevant CVEs, CVSS severity ratings, and MITRE ATT&CK techniques in a security assessment report.

Cybersecurity Practical Training — Hack-The Box Academy | Ongoing

- Hands-on exercises covering Windows and Linux fundamentals, command-line operations, permissions, system analysis, web application fundamentals, and basic penetration-testing concepts.

EDUCATION

Bachelor of Science in Computer Science

- South Eastern Kenya University — Sept 2019 – Oct 2024

CERTIFICATIONS

- Cyber-Shujaa Security Analyst Training — Ongoing
- Google Cybersecurity Professional Certificate — Google
- Cisco Certified Support Technician (CCST) — Cybersecurity
