PROFESSIONAL SUMMARY

Computer Science graduate and Cybersecurity Specialist with hands-on experience in SOC operations, endpoint security, SIEM event monitoring, and enterprise IT support in public sector environments. Skilled in incident identification, vulnerability assessments, and system patching using tools like NetWitness SIEM, Bitdefender GravityZone, and ManageEngine. Certified in Google Cybersecurity and Cisco Support, with practical expertise developed through SOC Level 1 labs and threat intelligence reporting. Seeking a Junior Cybersecurity / SOC Analyst role to contribute to security operations and threat mitigation.

TECHNICAL SKILLS

- **Security Operations & Monitoring:** NetWitness SIEM, Event Analysis, Incident Triage & Escalation, Vulnerability Assessments, Phishing Awareness & Training
- **Threat Intelligence & Frameworks:** MITRE ATT&CK Framework, CVSS Scoring, Indicators of Compromise (IOC) Analysis, CVE Research
- **Endpoint & Systems Management:** Bitdefender GravityZone, ManageEngine Patch Management, Active Directory (User Provisioning & Access Control), Windows & Linux System Administration (CLI)
- **Networking & Tools:** Nmap, Wireshark, TCP/IP, DNS, DHCP, LAN/WAN/VPN, Microsoft 365, SharePoint Administration

PROFESSIONAL EXPERIENCE

Cybersecurity Intern | Energy and Petroleum Regulatory Authority (EPRA) — Nairobi, Kenya
May 2026 – Present

- Monitored network traffic and security events using NetWitness SIEM, triaging alerts to accelerate incident response workflows.
- Managed endpoint security operations via Bitdefender GravityZone, identifying threat vectors and ensuring proper antivirus agent deployment across organization hosts.
- Executed system update schedules and software patch deployments using ManageEngine Patch Manager, systematically reducing vulnerability exposure.
- Administered Active Directory and Microsoft 365 environments, handling user provisioning, access rights management, and technical escalations.
- Configured and deployed network infrastructure hardware, including IP phones and workplace workstations, while delivering Tier-1/2 technical support.

ICT Support Intern | Nairobi Centre for International Arbitration (NCIA) — Nairobi, Kenya
May 2025 – May 2026

- Supported end-user IT operations, resolving Windows OS, application, printer, and domain connectivity issues for internal staff.
- Conducted primary network diagnostics across TCP/IP, DNS, and DHCP configurations to maintain uninterrupted local network uptime.
- Administered user access policies within Active Directory and maintained the hardware/software inventory pipeline.

SECURITY PROJECTS & LAB PRACTICALS

SOC Level 1- TryHackMe

- Completed hands-on modules in SIEM event investigation, network packet analysis with Wireshark, and incident triage.

Vulnerability Assessment & Threat Intelligence Report- Independent Project

- Conducted active network reconnaissance using Nmap, identifying open ports, service versions, and exposed vulnerabilities.
- Authored a threat intelligence report mapping findings to CVE records, CVSS severity scores, and MITRE ATT&CK execution techniques.

Cybersecurity Practical Training -Ongoing -Hack The Box Academy

- Hands-on exercises in Windows/Linux OS architecture, command-line system analysis, permissions auditing, and web application architecture fundamentals.

EDUCATION

Bachelor of Science in Computer Science

South Eastern Kenya University — Kenya

CERTIFICATIONS

- Cyber Security Analyst hands on labs and training- CyberShujaa (ongoing)
- Google Cybersecurity Professional Certificate — Google
- Cisco Certified Support Technician (CCST- Security)— Cisco
- Google IT System Administration and IT Infrastructure Services Certificate — Google
